

CGS 4854 Website Construction and Management

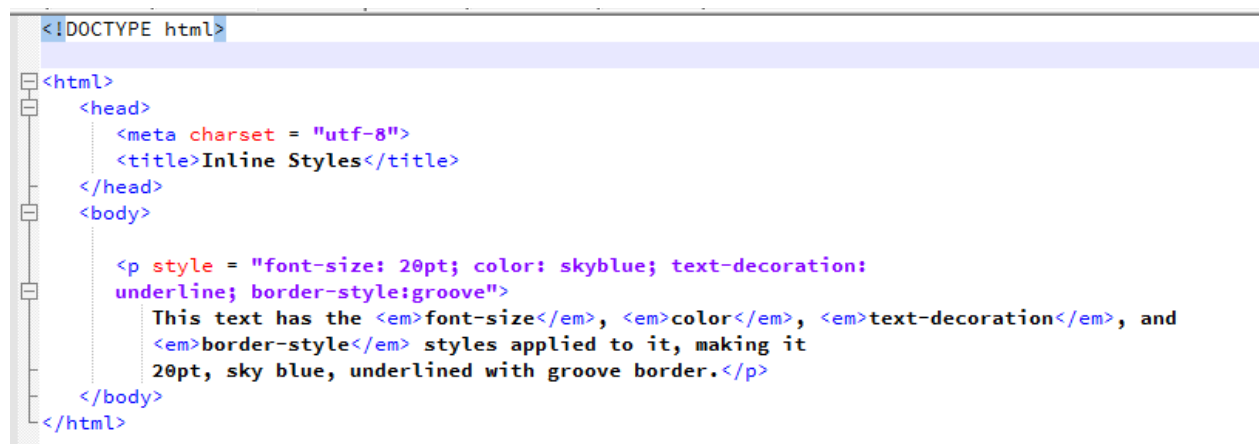

Exercise 2 – CSS [60 points]

1. Create a 'style' folder in 'MyFirstWeb' project created in Exercise 1.
 2. Create new webpages as given below with each example.
 3. Create stylesheets as given below. Save external stylesheets in 'style' folder.
 4. Complete all the examples given below.
 5. Images are given in image folder.
 6. Submit project folder (zipped) on Canvas comprising of Exercise 1 and 2 both by adding respective webpages and stylesheets.
-

- A. As shown in Figure 1, create a webpage '**exercise2A.html**' using an inline stylesheet for the following properties. Set an inline style sheet for a paragraph of text setting the following properties. **[10 points]**

Font size is 20pt, color is skyblue, underline text and groove border style.

"exercise 2A.html"

```
<!DOCTYPE html>

<html>
  <head>
    <meta charset = "utf-8">
    <title>Inline Styles</title>
  </head>
  <body>

    <p style = "font-size: 20pt; color: skyblue; text-decoration:
underline; border-style:groove">
      This text has the <em>font-size</em>, <em>color</em>, <em>text-decoration</em>, and
      <em>border-style</em> styles applied to it, making it
      20pt, sky blue, underlined with groove border.</p>
  </body>
</html>
```

Figure 1

B. Write the stylesheet code as shown in Figure 2 in an external style sheet 'newstyle.css' and link it with your webpage as shown in Figure 3. [10 points]

"newstyle.css"

```
body { font-family: arial, helvetica, sans-serif; }
a.nodect { text-decoration: none; }
a:hovert { text-decoration: underline; }
li em { font-weight: bold; }
h1, em { text-decoration: underline; }
ul { margin-left: 20px; }
ul ul { font-size: .8em; }
```

Figure 2

"exercise2B.html"

```
<!DOCTYPE html>
<html>
  <head>
    <meta charset="utf-8">
    <title>Linking External Style Sheets</title>
    <link rel = "stylesheet" type = "text/css"
        href = "styles.css">
  </head>
  <body>
    <h1>Shopping list for <em>Monday</em>:</h1>

    <ul>
      <li>Milk</li>
      <li>Bread
        <ul>
          <li>White bread</li>
          <li>Rye bread</li>
          <li>Whole wheat bread</li>
        </ul>
      </li>
      <li>Carrots</li>
      <li>Yogurt</li>
      <li>Pizza <em>with mushrooms</em></li>
    </ul>

    <p><em>Go to the</em>
      <a class = "nodect" href = "http://www.deitel.com">
        Grocery store</a>
    </p>
  </body>
</html>
```

Figure 3

- C. Create a webpage '**exercise2C.html**' for the HTML document and embedded Style sheet as shown in Figure 4. **[10 points]**

"exercise2C.html"

```
<html>
  <head>
    <meta charset = "utf-8">
    <title>Background Images</title>
    <style type = "text/css">
      body { background-image: url(logo.png);
              background-position: bottom right;
              background-repeat: no-repeat;
              background-attachment: fixed;
              background-color: lightgrey; }
      p    { font-size: 18pt;
              color: Darkblue;
              text-indent: 1em;
              font-family: arial, sans-serif; }
      .dark { font-weight: bold; }
    </style>
  </head>
  <body>
    <p>
      This example uses the background-image,
      background-position and background-attachment
      styles to place the <span class = "dark">Deitel
      & Associates, Inc.</span> logo in the
      bottom-right corner of the page. Notice how the logo
      stays in the proper position when you resize the
      browser window. The background-color fills in where
      there is no image.
    </p>
  </body>
</html>
```

Figure 4

- D. Create ‘**exercise2D.html**’ webpage and add an embedded style sheet as shown in Figure 5. The style sheet should contain a rule that displays <h1> elements in green. In addition, create a rule that displays all links in red without underlining them. When the mouse hovers over a link, change the link’s background color to yellow with an underline. Validate the style sheet at <http://jigsaw.w3.org/css-validator> through direct input. [10 points]

“exercise2D.html”

```
<!DOCTYPE html>

<html>
  <head>
    <meta charset="utf-8">
    <title>Solution 8</title>
    <style type = "text/css">
      h1    { color: green }
      .dark { font-weight: bold }
      a     { text-decoration: none; color: red }
      a:hover { background-color: yellow; text-decoration: underline}
    </style>
  </head>
  <body>
    <h1>Here are my favorite sites</h1>
    <p><span class = "dark">Click on a name to go to
      that page.</span></p>
    <p><a href = "http://www.facebook.com">Facebook</a></p>
    <p><a href = "http://www.twitter.com">Twitter</a></p>
    <p><a href = "http://www.foursquare.com">Foursquare</a></p>
    <p><a href = "http://www.google.com">Google</a></p>
  </body>
</html>
```

Figure 5

- E. Create a webpage, ‘**exercise2E.html**’ applying embedded style sheet to produce the output as shown in **Error! Reference source not found.6**. Validate the style

sheet at <http://jigsaw.w3.org/css-validator> through direct input.

      </figure>
      <article>
        <header>
          <h3>General Information</h3>
        </header>
        <p>
          Penguins are true flightless birds. Some species spend as
          much as 75% of their lives at sea,
          yet they all breed on land or sea-ice attached to land. To withstand the harsh
          conditions of the
          Antarctic, their bodies are insulated by a thick layer of blubber and a dense
          network of waterproof
          plumage. Penguins' bones are solid and heavy, which help them to remain
          submerged and reduce the energy
          needed for pursuit diving. Some species can reach depths of 1000 feet or more
          and stay submerged for up
          to 25 minutes, though most prefer shorter, shallower dives.
